ITLS6010 WMS Assignment Rubric - Jyoti B

Criteria	Scales HD: 85-100%	DI: 75-84%	CR: 65-74%	PS: 50-64%	FA: 0-49%
WMS Design (45%) Part 1 of the Assignment	Masterfully crafted WMS database design with reasoning that demonstrates critical thinking in relation to all elements of the design. There are no logical inconsistencies. The design integrates research on database design beyond the content provided during Weeks 1 to 5.	Expertly crafted WMS database design with reasoning that demonstrates critical thinking in relation to all elements of the design. There are minor logical inadequacies in the database design and associated assumptions.	Skilfully crafted WMS database design with reasoning that demonstrates moderate levels of critical thinking in relation to all elements of the design. There are a few notable logical inadequacies in the database design and associated assumptions.	Adequately crafted WMS database. The design does not display adequate critical thinking. There are several notable logical inadequacies in the database design and associated assumptions.	An inadequate WMS design. The flow of logic is not evident to the reader or is not relevant to the objectives of the assignment or there are significant logical inadequacies in all or most aspects of the database design presented.
SQL Queries (45%) Part 2 of the Assignment	Masterfully crafted SQL queries with reasoning that demonstrates critical thinking in relation to all queries. There are no logical inconsistencies. The query designs integrate research beyond the content provided during Weeks 1 to 5.	Expertly crafted SQL queries with reasoning that demonstrates critical thinking in relation to all queries. There are minor logical inadequacies in the design of the queries and associated assumptions.	Skilfully crafted SQL queries with reasoning that demonstrates moderate levels of critical thinking in relation to all queries. There are a few notable logical inadequacies in the design of the queries and associated assumptions.	Adequately crafted SQL queries. The queries do not display adequate critical thinking. There are several notable logical inadequacies in the design and associated assumptions.	Inadequately designed SQL queries. The flow of logic is not evident to the reader or is not relevant to the objectives of the assignment or there are significant logical inadequacies in the design of all or most of the queries presented.
Communication (10%) Written Communication in the Assignment	Communicates meaning unambiguously in their own voice. Flawlessly proofread paper with no issues with spelling, grammar, syntax, and referencing (where appropriate).	Communicates meaning unambiguously in their own voice. Expertly proofread paper with minor issues with spelling, grammar, syntax, and referencing (where appropriate).	Communicates meaning clearly. Submission demonstrates self-evident clarity and structure. Skilfully proofread paper with notable issues with spelling, grammar, syntax, and referencing (where appropriate).	Communicates meaning with adequate clarity. Adequately proofread albeit with frequent and/or unobstructive issues with spelling, grammar, syntax, and referencing (where appropriate).	Meaning is not communicated clearly due to frequent issues with spelling, grammar, and syntax that interfere with the reader's ability to comprehend the work and/or no referencing (where appropriate).
